RE: v.

Dear :

My office and our client have received a barrage of Threatening and Harassing E-mails from Dr. Norman Finkelstein which are devoid of true facts and without any legal basis. This must Stop. The Trial Judge has been apprised of the E-mails and the Nassau County Police Department have been apprised of the Threatening and Harassing E-mails.

It is very sad that your alleged friend is attempting to stoke the flames of a Divorce Action that was Settled before the Court when both of the parties were pleased that the matter was finally put to rest. It is shameful that your friend is attempting to revisit the Negotiations although a non-participant in the negotiations and attempt to change the History as to what has transpired.

If the barrage of E-mails continue Dr. Norman Finkelstein might be subject to Criminal Charges and a Claim for Defamation. The saddest part of his actions is that he will open up Pandora's Box in relation to which might cause severe repercussions in relation to the evidence that was already placed on the Record. Each of the litigants are now in the process of going on with their lives separate from each other but Dr. Finkelstein is now attempting to place their lives once again in the Public Domain. and and their children do not deserve this.
